Fuel Price Ranges in Vermont

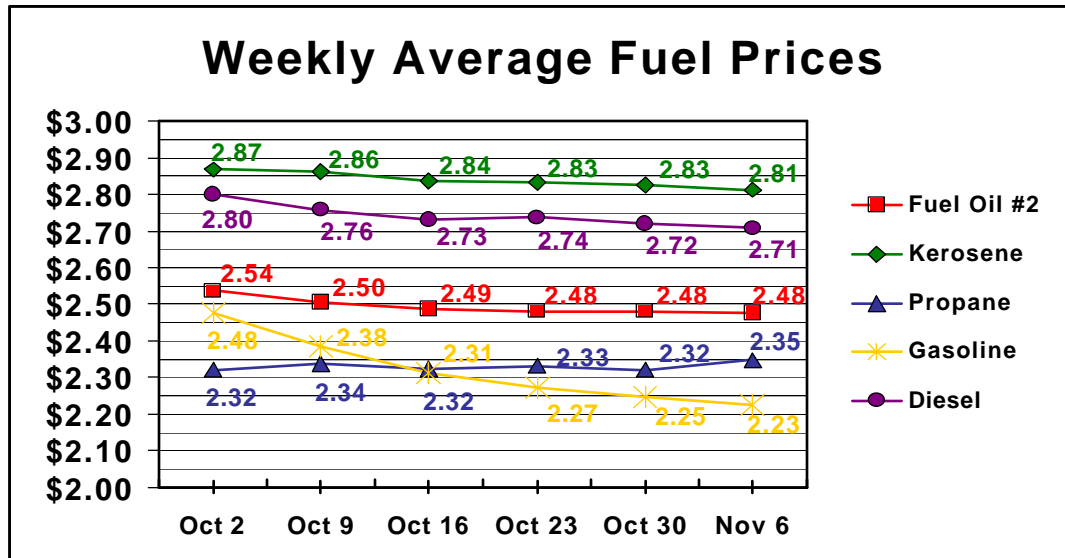

Gasoline and Diesel Prices

The Energy Information Administration (EIA) has reported that as of November 6th the national average retail price of regular gasoline fell to \$2.20 per gallon, the lowest price so far this year. The national average retail price of diesel was \$2.51, which is 19 cents lower than the same time last year.

Crude Oil

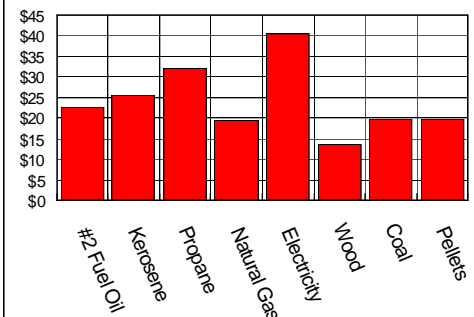

The announcement by OPEC that they will decrease oil production by over 1 million barrels per day (effective November 1st) hasn't had the predicted impact of raising crude oil prices so far. However, the EIA is predicting that the average monthly price of crude oil will increase approximately \$2.00 per month for the next several months due to seasonal demand increases.
